

NCDF-CRYO Cryopreserved Cynomolgus fibroblasts

Cell Specification

Lot 062-190124

Batch release: Sept 29, 2020

<p>Skin: Face Gender: female Age: 3 years 1 month</p>	<p>Serology: Negative for a Herpes virus, Herpes B virus, STLV-1, SIV, SRV 1-5, Ebola</p>
<p>Cryopreservation: January 24, 2019 Number of cells per vial: 4.0×10^6 cells</p>	<p>Thawing: $n = 7$ Viability after thawing: $97 \pm 1 \%$ Yield after thawing: $3.6 \pm 0.7 \times 10^6$ cells Culture in FGM (Fibroblast Growth Medium) Number of Population Doublings: > 20 Mycoplasma: negative</p>
<p>Phase contrast in passage 1 after thawing (40x)</p> 	<p>Phase contrast in passage 1 after thawing (100x)</p> 
<p>Note: Yield, viability and population doublings are based on experiments performed at PRIMACYT using PRIMACYT's manual for thawing and culture of human/ Cynomolgus fibroblasts. This product should be considered as potential biohazard. Only intended for <i>in vitro</i> use.</p>	
<p>Issued by: A. Ullrich</p>
