

**Rainbow Trout Serum cryopreserved
Certificate of Analysis**

Lot 200415

Sexual immature Rainbow trout (*Oncorhynchus mykiss*) were kept under controlled housing conditions according to OECD guideline 319A/B at "Aquaristikshop" in Schwerin. Fish were supplied by Fish breeding Christophersen.

The animals do not originate from a facility conducting work or research with animal pathogens.

Rainbow trout blood was collected from 3 male and 4 female healthy trout using S-Monovette® Serum-Gel from Sarstedt. After centrifugation the serum was pooled, filtered (0.22 µm) and stored in aliquots at -80°C.

Donor demographics and lot specific information

Species	Gender	Size (cm)	Weight (g)	GSI index
Rainbow Trout	female	35	466	0,18
Rainbow Trout	male	37	453	0,04
Rainbow Trout	male	34	480	0,05
Rainbow Trout	male	32	428	0,04
Rainbow Trout	female	34	469	0,22
Rainbow Trout	female	35	475	0,15
Rainbow Trout	female	33	404	0,17

Store at -80 °C.

This product should be considered as potential biohazard. Only intended for *in vitro* use. Not intended for therapeutic use.
